"I wish to take this opportunity to express my appreciation to Mr. E.C. Watson who suggested the main problem of this thesis and who has continuously shown a great interest in the work. I wish also to express my indebtedness to Professor R.W. Sorenson who furnished the original metal-glass seals for the electron tube. I have also received many valuable suggestions from other members of the staff to whom I am most grateful. My sincere thanks are also due Professor R.A. Millikan for the personal interest he has shown."
