

# Michael Lester Norman

(19xx - )

**Ph.D.** California, Davis 1980 <sup>1</sup>

**Dissertation:** A numerical study of rotating interstellar clouds: equilibrium and collapse. <sup>1</sup>

**Advisor:** James Ricker Wilson <sup>1,2,3</sup>

**Student:** Dinshaw S. Balsara <sup>2</sup>

## Notes:

<sup>1</sup> Norman, M.L. A numerical study of rotating interstellar clouds: equilibrium and collapse. Ph.D. Thesis, University of California, Davis, 1980.

“Jim Wilson has been the guiding light in both the numerical and astrophysical aspects of this project. I gratefully thank him for letting me watch him work.”

Committee in charge:

James R. Wilson, chair

William A. Newcomb

Kenneth D. Marx

Albert Cheng
