

Watt Wetmore Webb

(1927 -)

Ph.D. Massachusetts Institute of Technology 1955 ^{3,4}

Dissertation: Oxidation studies in metal-carbon systems. ^{3,4}

Advisors: John Torrey Norton ^{3,4}
Ernest Carl Wagner ^{3,4}

Student: Malcolm Roy Beasley ^{1,2}

Notes:

¹ Beasley, M.R. Flux creep in hard superconductors. Ph.D. Dissertation, Cornell University, Ithaca, NY, 1968.

“He is most indebted to Professor W.W. Webb for his guidance, interest, and enthusiasm which never waned throughout our rather long association.”

² Email communication with MR Beasley (4 Oct 2001)

³ Webb, W. W. Oxidation studies in metal-carbon systems. Ph.D. Thesis, Massachusetts Institute of Technology, 1955.

“Profound thanks are due to Professors Carl Wagner and J. T. Norton for their supervision of this research, and for many stimulating discussions which have been the most elucidative factor of the author’s graduate training. In particular, most of the theoretical foundations of this work were laid out in July 1953 by Professor Wagner, or were evolved from discussions with him. The problem was suggested jointly by Professors Norton and Wagner.”
